

NEW OR MOVED PROMETHEAN TOOLS

Stop / Start Flipchart Vote: Determines when students may begin voting or stops all voting.

Shape: Displays built-in shapes, including circles, diamonds, stars and others.

Page Browser: Shows all flipchart pages, making them available to be modified or moved.

Pin Toolbox: Keeps the tools from disappearing.

Switch Profile: Used to toggle among the available profiles, including authoring and mathematics.

Desktop Tools: Minimizes the flipchart and provides a small, floating tool palette on the desktop.

Express Poll: Quickly activate the voting system.

Software UPDATES

Click on **User Defined button**.
Click on **Settings**.
Click on **Online Settings**
Under proxy settings add the following:
proxy server: **proxy.cpsb.org**
port: **8080**

password

http://www.prometheanwc
http://www.activsoftware.
proxy.cpsb.org
8080
firstname.lastname

Connector: Displays built-in connectors for drawing relationships and linking text / objects.

Resource Browser: Previously represented by a stack of books, this is Inspire's version of the Resource Library.

Reset Page: Returns the page to its previously saved state.

THE NEW DASHBOARD

Flipcharts...: Displays a list of recent flipcharts (to the right).

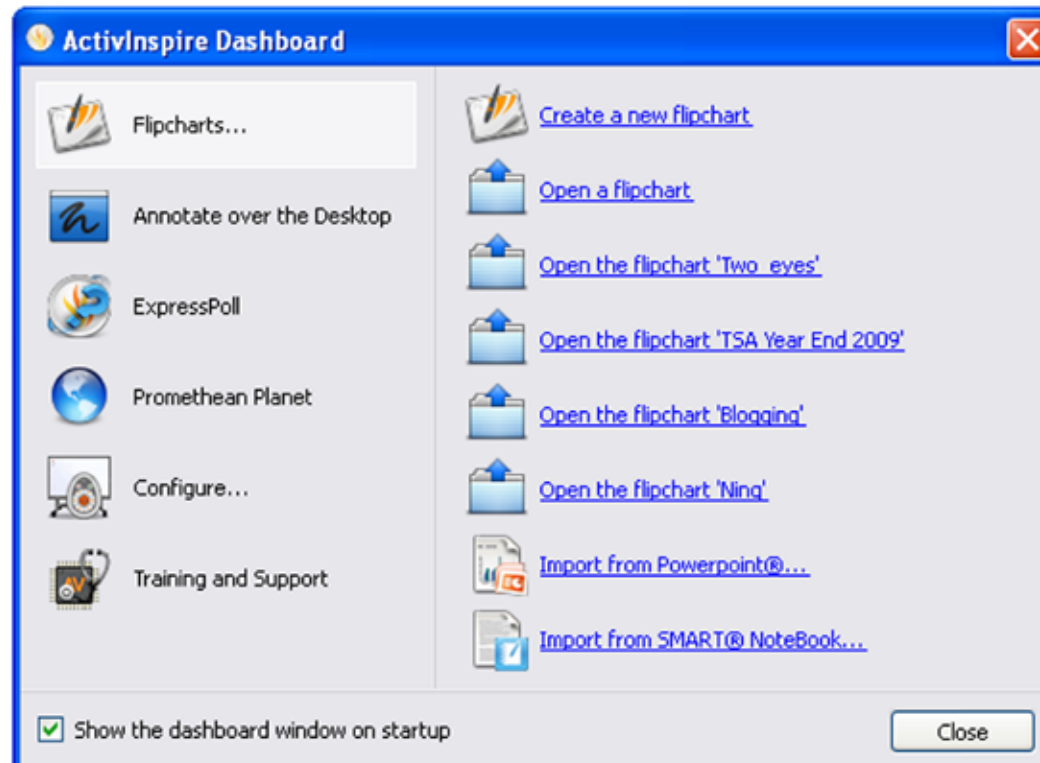

Annotate over the Desktop: Switches to a desktop flipchart.

ExpressPoll: Begins an impromptu voting session.

Promethean Planet: Sends you to the Planet home page.

Configure...: Register voters and slates; configure profiles.

Training and Support: Get online help.

Create a new flipchart

Open an existing flipchart

Lists the four previously opened flipcharts

Import from PowerPoint: Convert an existing presentation.

Import from SMART: Convert SMART NoteBook files.

WHAT'S MISSING?

Because ActivInspire is an entirely new product, some ActivStudio Professional features had to be left out of the first release. These missing features may or may not be added at some point in the future. So what is missing from this first version?

- **Page Turn Effects:** The 3-D page turn effects are gone, at least for now. Promethean has publicly stated that the turn effects will be back in a future release.
- **Design Mode:** The authoring profile has replaced design mode. To switch to the authoring profile, click the Switch Profile button on the toolbar.
- **Built-in Web Browser:** Promethean's clunky, built-in web browser has been replaced. Any hyperlinks will now open your default web browser.
